

HDL[®]

Enviremote

The most useful remote in your smart-building

The Enviremote is a wireless, dedicated universal remote to control your HDL smart-building. Lights, heating, music, air-conditioning, TVs and other equipment can all be controlled from the palm of your hand.

Convenient Use

The easy navigation buttons and a large LCD screen, quickly scroll to the screen of your choice and press the buttons to operate, wirelessly.

LCD with multiple function pages

With fully featured pages to control lighting, heating, HVAC, music, curtains, blinds, security and more, the Enviromote makes it clear and easy to control your building.

Ergonomic Design

Communication

The Enviromote has an ergonomic design and a contemporary look and feel. It will not look out of place the coffee table or on the bedside.

The Enviromote has a convenient Micro-USB charging port, making batteries a thing of the past.

Chargeable

The Enviromote has both Infrared (IR) and Radio Frequency (RF) control. The IR allows control of AV devices, such as TVs and air-conditioners. The RF provides control of lighting, heating, and other features, up to 100m away and without requiring line-of-sight.
